

STACY WAITHERA KAMAU

Full Stack Software Developer

Nairobi, Kenya | softwaredevstacy@gmail.com | +254798806156 | [LinkedIn](#) | [GitHub](#) | [My Portfolio](#)

PERSONAL PROFILE

Full-Stack Software Developer with a background in Mathematics & Computer Science and hands-on experience building full-stack web applications and software products. Skilled across both frontend and backend development, API integration, databases. Experienced in collaborating on real-world software projects, debugging and testing systems, and developing practical solutions to user needs.

EDUCATION

- **Bachelor of Science in Mathematics and Computer Science**
Jomo Kenyatta University of Agriculture and Technology (JKUAT) | September 2022 – December 2026
 - **Software Development Program – Full Stack Web Development (MERN Stack)**
Power Learn Project (PLP) | February 2025 – July 2025
 - **Artificial Intelligence & Machine Learning (AI & ML)**
Samsung Innovation Campus (SIC) | June 2026 – Present
-

TECHNICAL SKILLS

- **Frontend:** HTML, CSS, JavaScript, React.js, TypeScript
 - **Backend:** Python, Flask, Express.js, Node.js
 - **Mobile:** React Native, Expo
 - **Databases:** MySQL, MongoDB, Firebase/Firestore
 - **UI/UX & Design:** Miro, Wireframing
 - **DevOps & Version Control:** Git, GitHub, Docker, CI/CD
 - **Other:** API Integration, Database Design, ERDs
-

WORK EXPERIENCE

Software Development Intern

JHUB Africa – JKUAT | June 2026 – August 2026

- Developed and enhanced the Samsung Innovation Campus Website and Learning Management System (LMS) using Python, Flask, JavaScript, HTML/CSS, and MySQL, building a full-stack platform with dedicated interfaces for Students, Instructors, and Admins.
 - Built and connected Student and Instructor LMS functionality including authentication, dashboards, curriculum management, assignments, analytics, profiles, announcements, student progress tracking, and capstone projects.
 - Integrated frontend interfaces with APIs and the database, replacing hardcoded data with dynamic, user-driven content that updates across the system based on activity.
 - Collaborated with the development team using Git and GitHub, managing branches, resolving merge conflicts, and integrating team members' work into the main project.
 - Tested the system, identified and fixed bugs, and supported Docker and CI/CD deployment, ensuring the different components of the LMS worked together correctly.
-

PROJECTS

GPS Attendance — Mobile App

React Native (Expo), TypeScript, Firebase Auth & Firestore, Cloudinary, Expo Router

- Developed a mobile attendance system combining GPS geofencing and selfie verification, using expo-location and the Haversine formula to restrict attendance to within 100m of a lecture theatre.
- Built a guided selfie capture flow with Cloudinary uploads, Firestore attendance records, and duplicate-submission prevention based on student, unit, and date.
- Implemented institutional-email authentication, student profiles, smart course-based unit scheduling, and real-time attendance reports with attendance-rate visualization, history, and filtering.

StudentOrg

ReactJS, ExpressJS, Firebase, NodeJS, Google Cloud Firestore

- Developed an all-in-one full-stack web application for centralizing students' academic, personal, and financial management.
- Implemented Firebase authentication and data storage and developed backend functionality using JavaScript.

Weather App

ReactJS, JavaScript, Axios, OpenWeatherMap API

- Developed a weather application integrating the OpenWeatherMap API to display current temperature, humidity, wind speed, and a 5-day forecast.

Palindrome Checker

JavaScript

- Developed a web-based palindrome checker with real-time validation, applying string manipulation, regular expressions, and event handling.

CERTIFICATIONS

- **Oracle Cloud Infrastructure Foundations Associate** — Oracle
- **Full Stack Software Development (MERN Stack)** — Power Learn Project
- **General Course on Intellectual Property** — WIPO
